

▶ ▶ ▶ **MILLER® TURBOLITE™ EDGE 1033465**

PRODUCT INFORMATION

The TurboLite™ Edge is a small, lightweight retractable self-retracting lifeline designed to arrest a fall within millimetres, and has the ability to be connected at foot level. The edge-tested webbing provides extra security for all work situations, including connection at foot level.

PRODUCT FEATURES

- Its retractable technology prevents trip hazards, while its built in swivels on both ends prevent the lifeline twisting.
- The engineered Hi-Tech Polyester/ Vectran® webbing has been edge-tested, making it suitable for working near sharp edges (radius $\geq 0.5\text{mm}$). This aids in providing more resistance to abrasion, increasing durability.
- The webbing also incorporates a fall indicator with a red warning flag, which instantly alerts the operator that the unit has sustained a fall.
- It provides a 2m working capacity lifeline which attaches directly to the harness back D-ring for greater mobility and versatility.
- The TurboLite™ Edge eliminates the need for different fall protection equipment to address fall clearance and reduces risk as workers will always be using the proper equipment when the fall clearance changes.
- The TurboLite™ Edge can also be used in horizontal and foot level applications where an overhead anchorage point is unavailable (please read supplementary instructions on horizontal usage).

STANDARDS

- Conforms to standard EN 360
- Accepted under clause 1.6 of AS/NZS 1891.3

TECHNICAL INFORMATION

- Maximum rated load: 140kg— even when connected at foot level.
- Terminations: 21mm aluminium twist lock karabiner on the top (anchorage) and 18mm aluminium twist lock karabiner on the bottom (user).
- High impact nylon housing, Stainless Steel braking mechanism, Polyester/Vectran® edge-tested webbing.
- Polyamide shock absorber — must be connected to the user.

APPLICATIONS

- Construction
- Utilities
- Warehousing
