

Design

The Gazelle Series basket stretchers include three distinct versions in an all-carbon-steel, MIG welded frame construction. All three rely on its frame geometry, construction methods and materials for its' ultimate strength.

The Gazelle Series is designed to fill the gap, where the high-end basket stretchers are not required for users, either for their strength or for their durability.

The Gazelle Series are made using a tubular, 19mm top frame as well as lower rails. This is in contrast to other models it competes with, where the lower frames are made of flat steel. The tubular runners are far stronger, and give a much longer life to these basket stretchers.

The Gazelle Series are not specifically designed to perform in a technical rescue environment from a design perspective, however, they are more than capable of being used in a raise/lower operation in terms of strength .

Unique features include flat carbon steel patient-supports down the length of the stretcher. The Durathene netting allows water and air to easily pass through the patient compartment, yet the small holes keep from snagging debris as easily. The Durathene material will not rust and potentially cause additional harm to your patient, and they are attached with shock-cord so they will give-way when loads are improperly placed on it.

Tested to and beyond a 408 kg. (900 lb.) static threshold, users can be confident in their use of any of the Gazelle basket stretchers

Tested to and beyond a 408 kg. (900 lb.) static threshold, users can be confident in their use of any of the Gazelle basket stretchers

Features

- **Tapered Model** - Allows easier access in confined areas
- **Regular (Rectangular) Model** - Allows any Backboard
- **Confined Space Model** – Allows for entry and egress into most confined spaces.
- **Durathene™ Netting** – Replaces the old-style chicken wire.

Certifications;

No UL Classifications for Stretchers

CE Classified and Certified as a Class 1 Medical Device in **August, 2003**

Part No.	Description	Width	Length	Weight	Load Rating
11-0105	Gazelle Regular	62cm./24.4in.	211cm./83in.	13kg./29lbs.	4 kN (900 Lbs.)
11-0106	Gazelle Tapered	62cm./24.4in.	211cm./83in.	13kg./29lbs.	4 kN (900 Lbs.)
11-0107	Gazelle Confined Space	46cm./18in.	211cm./83in.	12kg./26.5lbs.	4 kN (900 Lbs.)
