

HIGH LEVEL CLEAN

WHAT VALUE WAS ADDED FOR THE CUSTOMER

- The facility was able to continue production with no disruption to mill facility operation resulting in maintaining site productivity with limited financial cost incurred.
- The end-of-year plant offline maintenance period was reduced by conducting preliminary roof bracing cleaning works during plant operation.
- Work was able to be performed during cooler evening periods with multiple staff shift rotations to minimize the risks presented by the hazardous work environment.

CASE STUDY

CUSTOMER NAME

Cement Australia

LOCATION

Brisbane riverside plant facility

SCOPE OF WORKS
