Abseiling Rope Guide and Gutter Protector

SafetyLink's Abseiling Rope Guide & Gutter Protector is uniquely designed to mimic the protective properties of our patented Fixed LadderLink.

- Made from Marine Grade Aluminium.
- Protects your ropes being damaged when abseiling over a sharp edge or gutter.
- Guides your ropes.
- Protects the guttering systems from rope pressure and damage.
- Easy to install and unobtrusive.
- Can be permanently installed or removed after use.
- One person user.

Using the Abseiling Rope Guide & Gutter Protector will ensure your ropes do not get damaged when abseiling over a sharp edges or guttering systems. Conversely the bracket will ensure no damage is done to the gutter when in use, expertly guiding the rope exactly where you want them. The abseiling bracket is easy to install and complements any buildings' facade. It can also be removed with ease after use, making it a very versatile product.

The Abseiling Bracket has two collared eyebolts attached, these are not to be used as load rated anchors in any situation. The collared eyebolts are present to ensure that the abseil ropes will stay in there desired location and do not slip from the bracket. It is recommended that a strap be used between the collared eyebolts to secure the abseil ropes so they cannot unintentionally leave the Abseiling Bracket.
