Zenith

The newly available KASK Zenith safety helmet has been specifically engineered for industrial applications and includes many features to provide the highest protection standards, comfort and versatility.

Designed with a closed ABS external shell, the Zenith protects against electrical hazards to 1000V DC/1500V AC and incorporates improved features to enhance wearer comfort and safety.

The Zenith is certified to Australian Standards AS/NZS 1801.1997 Occupational Protective Helmets.

Zenith Features

Closed shell design protects against electrical hazards. High density ABS plastic shell withstands significant impact

Detachable lamp clips are compatible with all head lamps with elastic bands

Low profile attachment point for helmet accessories which are quickly attached using the Easy Click System

Adhesive label for writing name

Earplug hooks

Attachment ring to clip helmet to a harness

Eco-leather chinstrap is soft, low allergenic and washable

Quick-dial wheel for fast, precise adjustments

Adjustment buckle for lateral adjustment

Up & Down 2.0 system pivots the rear head strap providing extra comfort and fit

VKA WAC00013	Zenith Neck Shade (Grey)		

For compact storage, the internal shell and strap system is designed so helmets can nest on top of each other.

Removable and washable front pad

Fast3Dry high-tech 3D fabric that dries quickly and wicks moisture away from the head

Inner padding is treated with Sanitized® technology that acts as an internal deodorant and effectively prevents bacterial growth

Thick layer of HD Polystyrene provides all-round impact protection plus insulation from over head heat sources. Configured for maximum coolness and ventilation

Zenith's four-point chin strap and suspension system allows for precise adjustment of the helmet's width, height and tilt to fit all head sizes

Zenith Accessories

Zenith + Earmuffs	  <p>CLASS 5 EARMUFFS BLACK / ORANGE</p>	Miscellaneous	  <p>ZENITH REFLECTIVE STICKER SET</p> <p>NECK SHADE</p>

HP Plus

The Kask HP Plus is a high-tech, feature-rich helmet specifically designed for professional rescue and work-at-heights applications.

Lightweight (480 g) and compact, the helmet is comfortable to wear with ten air intakes protected by anti-intrusion mesh to deflect debris and liquids.

The helmet's ABS outer shell is constructed to withstand forceful impact while the internal shell design offers improved ventilation, greater adjustability and comfort.

The HP Plus is certified to Australian Standards AS/NZS 1801:1997.

Removable and washable inner padding is treated with Sanitized® technology that acts as an internal deodorant and effectively prevents bacterial growth

2DRY high-tech fabric dries quickly and wicks moisture away from the head

For compact storage, the internal shell and strap system is designed so helmets nest on top of each other.
