

Miller® Spreader Frame

Product description

Spreader frames aid in the rescue of victims from confined spaces, especially in a vertical rescue situation. These frames are for use with full body harnesses. Traditionally the harnesses required confined space attachments, however the new generation of universal spreader bar have the capability to attach to any full body harness.

FEATURES

- 19mm hooks on the "468 Frame" attach directly onto the confined space loops or d-rings of any confined space harness.
- Karabiners on the "Universal Spreader Bar" attach directly onto the shoulder straps of ANY full body harness, converting it into a confined space harness.
- Top d-ring can be attached to a raising and lowering device (like a Tripod or Winch system).
- Wrist loops assist in removal of casualty from a confined space.
- Sturdy frame allows for the worker to comfortably wear a hard hat.

APPLICATIONS

- Mining
- Rescue
- Confined Space applications

468 Frame

Universal Spreader Bar

Technical Information

- Manufactured from 38mm polyester webbing
- Mild steel A-frame
- 25mm polyester webbing wrist loops.
- Weight 1.6kg (468 Frame)
- Weight 1.6kg (Universal Spreader Bar)

Standards

Refer to AS/NZS 2865 for confined space procedures and practices.
