Data Sheet

IGNITE NEON

The IGNITE NEON combines everything needed for a high-quality rope access harness.

It has an integrated chest ascender and its own grey coloured loops for attaching the seat board.

The built-in attachment points have the IGNITE series colour concept. Bright orange for the fall arrest attachment points. Grey for the work positioning and seat attachment points.

The high-quality, padded waist harness can be easily adjusted, as can the flexible leg connections, which have high wearing comfort because of the dual adjustment options. Once adjusted, you can depend on it to hold the desired position.

Breathable and removable shoulder padding as well as back padding prevent heavy sweating and the harness from cutting into the neck.

Four gear loops feature around the waist with a further two on the leg straps.

- Superior comfort harness for all rope access and rescue applications
- Integrated replaceable chest ascender
- AS/NZS 1891.3 Certified to 140 kg
- Multiple, flexible adjustment options
