

Type 3 Rescue Recovery Block

APOD-FAB25M

90-0449 I.K. Fall Arrest Block Adaptor is required to secure the fall arrest block to the Arachnipod or Industripod Series of tripods.

The APOD-FAB25 is a Type 3 Rescue Recovery Block which arrests a fall and also enables simple retrieval of the victim. With 25 metres of galvanised steel wire, the fall arrest block is compatible with the Ferno Arachnipod system, Industripod and Industripod+ tripods when used in conjunction with the I.K. Fall Arrest Block Adaptor.

Specifications

DESIGNATION	Type 3 single retractable fall arrestor with retrieval system for vertical usage
GENERAL USE	For use in conjunction with an approved fall arrest harness in situations where there is a risk of free fall
APPLICATIONS	(1) As part of a fall arrest system (2) As part of a restraint system
MATERIAL	Polymer casing with 4.8 mm galvanised steel wire
LENGTH	25 metres
RATING	Vertical Use: 140 kg
WORKING PARAMETERS	<ul style="list-style-type: none"> Maximum permissible angle: 40° between the vertical and the lanyard. Working temperature range: -30°C/-22°F to 50°C/122°F Systems used to access confined space must have a minimum strength of 12kN Anchorage point must have a minimum strength of 12kN
STANDARDS	CE, EN 360:2002; EN 1496:2017 Class B
PRODUCT LIFE	10 years from Date of Manufacture (DOM) provided the unit is used, maintained and stored according to instructions and has not been subjected to extreme conditions or harsh environments.
