

ONSITE COMPLIANCE

WHAT VALUE WAS ADDED FOR THE CUSTOMER

- Low visual impact facade access system to residents and local community
- Cost efficiencies as the installed Industrial Rope Access System eliminates the need for installation of expensive intrusive temporary scaffolding for the facade cleaning and painting project.
- Painting project efficiencies as facade access can be achieved by tradespersons easily.
- Limited interaction and disruption to the building occupants during facade works.
- A permanent access system which can be used in years to come when further building maintenance is required (Window cleaning)

CASE STUDY

CUSTOMER NAME

Leisuretex Painting

LOCATION

Brisbane inner city

SCOPE OF WORKS

Provide safe access to building facade for cleaning and protective coating.

OUTCOMES

Height Dynamics installed a Sayfa Industrial Rope Access anchor system to be utilised by abseiling technicians to undertake facade maintenance works.

The access system installed posed little impact to the building roof structure as a surface mounted system was utilised which was fixed to the roof sheeting with a structural riveting system.
